

# HOD FAST FACTS

## WHAT IS HOD?

Hypertrophic Olivary Degeneration is a rare neurological disease that affects the inferior olivary nuclei in the brainstem.

## HOW DOES HOD HAPPEN?

HOD can be caused by ischemic stroke, brain bleeds, tumors and/or tumor resections. Further research is required to fully understand why HOD develops in some patients.

## ARE THERE ANY TREATMENTS OR CURES?

As of 2022, there are no known cures. We need YOU to engage with our patient registry to help us become research ready!

## NOW WHAT?

We are a 501c3 patient organization that can help you find community & resources. Join our community!
